THE INNOVATIVE LOCKING SYSTEM

DOM RS 8

This is what a modern key ring for the entire house looks like

SECURITY, QUALITY, DOM.

SECURIDEV EDV-Nr.: 29-77-44 / en / 1 / 04.08 Subject to technical changes without notice

SECURE AND COMFORTABLE

Quality you can rely on

The DOM RS 8 system is the ideal locking system for those who value the highest level of security and yet do not wish to give up on comfort. Front door, basement, garage - three cylinders, one key. It does not come more convenient. Maximum resistance values ensure the perfectly comforting feeling of having optimally secured all doors and accesses. And all this in the proverbial DOM quality at an attractive price!

DOM RS 8 is an innovative locking system. With its intrinsic technical features and a key profile which is virtually impossible to copy, we provide our customers with new protection and security dimensions for houses and apartments.

High security

Your benefit: tested security makes you feel safe.

Maximum unlocking security

Your benefit: best possible protection.

High copy protection

Your benefit: as a registered owner, only you can have key copies made.

Easy handling

Your benefit: comfort + security all in one.

Easily extendable

Your benefit: a future-safe investment.

FLEXIBEL UND ANPASSUNGSFÄHIG

One system, numerous possibilities

The safety and comfort aspects of the system RS 8 convince in all highly differentiated locking system types. The wide range of types offers exemplary flexibility. The special option: the extra-safe, modular construction. Almost for any requirement there is the optimum solution.

In addition, the system DOM RS 8 can be combined with the electronic access technology of the brand DOM and thus offers an even larger variety of application and utilization possibilities, especially for future demands.

	RS 8
Access authorisation	
Locking authorisation queries	13
Massive locking elements mounted in a thrust-bearing	8
Increased protection from violent intrusion	
Increased protection	•
Pull protection via armour ring	optional
Drilling protection class in accordance with DIN EN 1303 04/2005	2
Locking safety class in accordance to DIN EN 1303 04/200	6
Certification / Standards	
VdS class B	optional
DIN EN 1303 04/2005	•
Profile types	
Europrofile and Roundprofile	•

THE CHARACTERISTICS

Comfort, diversity, future: all inclusive

Locking from both sides

The DOM locking system RS 8 in version T locks from both sides. The door can also be opened from one side if the key is in the keyhole on the other side.

Electronics compatible

The combination of mechanical and electronic features is completely unproblematic: simply mount a ClipTac (the electronic transponder unit) on the key.

DOM Safety circuit

In addition to the high-quality control and the manufacturer's warranty the Registration Card is also a part of the DOM safety circuit. Only the Registration Card authorises you to copy the original DOM keys.

Cylinder available in special colours

Suiting to the fitting: The RS 8 cylinders are available as a standard in matt nickel-plated or matt brushed brass, but also in five special colours: bright chromium-plated, polished brass, browned brass, German style or gold coated.

Modular construction

The RS 8 cylinders are suitable for all purposes owing to their modular construction. The positive-action connection of the chromium-nickel-steel ribs ensures increased tensile strength. At the same time the system of locking mechanisms offers the following advantages:

- Doors which could not yet be measured out, can be retrofitted easily later on by means of the system M.
- Later changes (e.g. due to relocation) can be carried out easily by means of modular cylinder extensions.
- With the system M the extension or installation of a locking system is implemented easily.
