## DAS LOCKING SYSTEM

DAS protects everything, with only one key.

The ix DAS turn key can be rotated and turned anyway you want: it always fits. Very handy and easy to take with you, but also very comfortable! As the owner of your own home, you will not need a huge bunch of keys anymore. Whether it is the lock for the front door, a room door, a cellar door, a window lock, a letter box or a garage door, with the innovative locking system ix DAS you need only one key!

Garage door

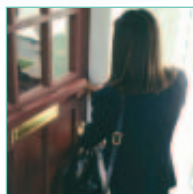

Letter box

Garden gate

Cellar door

Front door

### 10 reasons for the DOM ix DAS system

- A quality product from the DOM company
- Individual lock or locking installation
- highest protection from opening
- maximum protection against copying
- 5 active blocking elements
- 21 verifications of the locking authority
- Electronic compatibility
- Reserve keys available only with identity card / service card
- high-quality materials
- fixed and modular construction

## THE SAFETY PROPERTIES

DAS has good cards for extra safety.

With the ix DAS system, you will receive an identity card with the individual locks or a service card with the locking installations. That is your special safety advantage! Second keys can only be ordered at the DOM service centre when one of these cards is presented. With regard to safety you therefore have really good cards with ix DAS.

	ix DAS
<b>Access authorisation</b>	
Verifications of the locking authority	21
solid, thrust bearing blocking elements	5
<b>Protection against violent entry</b>	
Protection from drilling in accordance to DIN EN 1303 04/2005	2
Locking safety class in accordance to DIN EN 1303 04/2005	optional
Extra burglary protection from modular technique	optional
<b>Standards</b>	
DIN EN 1303 04/2005	•
<b>Profiltypes</b>	
	•

## THE COMFORT PROPERTIES

DAS makes a difference in comfort.

### Suitability of locking installations

The ix DAS system is ideally suitable for use in (general) main key installations or installations with central locking (main key installations).

### Simultaneous locking possible

You can open everything with one key; from the front door to the garage door. You can get more similar cylinders later.

### Lockable from both sides

All DOM turn key systems are available in the „lockable from both sides“ version. They can be opened from one side while the key is in place on the other side of the door.

### Modular construction

Thanks to the modular construction of the M system the ix cylinders always fit.

With considerable advantages:

- Doors, which cannot yet be measured, can easily be fitted with the M system at a later date.
- Later alterations, due to moving house for example, can be carried out easily with the modular cylinder extensions.

### Cylinders are also available in special colours

The cylinders from the ix series are standard matt nickel-plated, but are also available in special colours: glossy chrome, polished brass, tanned brass, Old German, gilt or matt brushed brass.

### Electronic compatibility

The combination of mechanical and electronic properties is possible: For this put a ClipTac (our electronic transponder) on your turn key.
